Dennis Rankin, E P Specialist,

We wish to comment re: the Study and Proposed Action of the Rural Utilities Services Agency, [etc.](#) Although we currently live in the Denver area, we have property in the Colorado City area and someday intend to relocate there. Unfortunately the growth in the area has been hampered by a number of factors; one of which is the existence of adequate and reasonable cost utilities infra-structure. Hopefully, your work will have a positive effect on this situation.

We certainly encourage and support the scope and progress of this project. While we will not be able to attend any of the meetings, we intend to follow along as it proceeds. Of course we are concerned about environmental impact, but believe that more visionary design and engineering methods can overcome the problems of the past and minimize that impact; while expanding and improving the electric utility service to the surrounding community.

Any follow-up information or reference links would be appreciated,
Thank you.

Hal & Llorin Teters
